

PLANET ARK™

Everyday Nature

Grounds for Learning

Thursday 16th June
4:00pm - 5:00pm AEST

Learn how to use Schools Tree Day to grow key learning areas across the Australian curriculum in a **FREE** webinar for early childhood educators, primary and secondary teachers.

Hear stories from a panel of educators. Find out how nature-rich learning environments grow brighter, happier, healthier and calmer children. Get advice about how to participate in Tree Day and have your questions answered in our Q&A session. You will also get a certificate acknowledging accredited professional development hours (including BOSTES). In the lead up to Planet Ark's Schools Tree Day, the largest nature care event in Australian schools, this is the ideal time to get growing!

Can't watch the webinar live? No problem! We'll send you a link for you to watch the webinar at a time that suits you.
